## Subscriber Management and WiFi Management

Proposal to

City of Santa Clara

Silicon Valley Power

Sept 26, 2008

### BACKGROUND:

Silicon Valley Power ("SVP") is the municipal electric utility owned by the City of Santa Clara, CA. SVP is seeking assistance from Milton Security Group LLC on an ongoing basis to assist with Subscriber Management of the WiFi network within the City of Santa Clara.

### PURPOSE:

The objective is to manage all wireless assets utilizing the WiFi system SVP recently purchased. This includes Free WiFi users, AMI, encrypted city laptop use and others.

### PROJECT OVERVIEW:

MSG will assist in the following areas to for Subscriber Management for WiFi services:

- 1.1 WiFi network design for each segment.
  - 1.1.1 Free Public WiFi
  - 1.1.2 Secured WiFi for City Employees
  - 1.1.3 Assisting with Secured Wifi for AMI devices (based on 3<sup>rd</sup> party specs)
- 1.2 Implement MSG-7000 Devices
- 1.3 Deployment and configuration.
- 1.4 Training SVP personnel.
- 1.5 Developing disaster recovery procedures.
- 1.6 MSG maintenance - monthly basis.

### HARDWARE OVERVIEW:

#### **Ownership and Warranty**

Milton Security Group will possess full ownership of the MSG-7000 equipment.

The hardware warranty for the MSG-7000 devices is full replacement of the defective hardware during the term of this agreement. A warm spare will reside on the premises to be used as a replacement unit in case of a failure to a production MSG-7000 device. In addition a MSG-RP System and spare will be onsite

### WORK PLAN OVERVIEW:

#### **1) Implement Subscriber Management for WiFi Services**

MSG will implement a hardware based subscriber management solution that provides a mechanism for providing WiFi access for Public use, City employees and AMI devices. The solution, an MSG-7000 device, will be deployed inline on the network, between the BAP locations and the SVP Network. The MSG-7000 device will provide admission and access control for all users on the WiFi network, providing granular control over how users access Network resources.

### *Phase1: Free Public WiFi Access*

The MSG-7000 will provide control over the administration and usage of the free, public WiFi area of the network. The following subscriber management functions will be implemented by the MSG-7000 to service the public WiFi area:

- Provide an informational splash page when users connect to the WiFi network.
- Limit allowable protocols on the network (ex: http, https).
- Provide point-to-point client IP addressing (/30 subnet mask) to eliminate client-to-client communication.
- Limit the allowable bandwidth per user.
- Implement time based access onto the network (if applicable)
- Registration requirements including email and user ID.
- Registration systems to maintain email, user ID, MAC address
- Monitoring to include time of use and bandwidth tracking per user.
- Reporting generation.

### *Phase2: AMI devices on WiFi*

The MSG-7000 will provide admission control for AMI devices, allowing them to connect to the network and access the resources needed to function properly.

- Network admission based on VLAN and unique AMI MAC Address.
- Access control limited to AMI business purpose use.
- User event logs will be delivered to TriGeo Security Information Manager for accounting and troubleshooting.

### *Phase3: Secured WiFi Access for City Employees*

As an identity-based access control device, the MSG-7000 can provide granular network access to the City employees based on their credentials. Using the current WiFi infrastructure, single SSID, City employees will launch an encrypted connection to gain access to the internal LAN.

- Require encrypted connection to MSG-7000 (L2TP+IPSEC, L2TP).

- Allow for LAN IP addresses.
- Control network access and protocols that traverse network.
- Integrate Authentication with Active Directory

When the WiFi network is upgraded with multiple SSID support, the MSG-7000 can be reconfigured to apply admission and access control based on the SSID of the connecting user (via VLAN tag).

## **2) MSG-7000 Training**

Milton Security Group will provide SVP support staff real time training on the usage and administration of the MSG-7000 devices for each of the above phases of the WiFi network. Topics will include the following:

- System overview
- Administrative configurations
- Troubleshooting techniques
- Report Writing and Creation

## **3) Disaster Recovery**

During each of the above phases, MSG will work with SVP to develop disaster recovery processes, along with accompanying procedural documentation, to provide to the appropriate SVP operations team. The following topics will be included:

- MSG-7000 configuration backups
- MSG-7000 device failure

## **4) Manage Subscriber Management for WiFi Services**

### ***Ongoing Support***

Milton Security Group will provide ongoing maintenance, support, development, design, report writing and assistance during this contract. This will include up to a maximum of 20 hours per month of either onsite or remote work to provide SVP with the needed resources to accomplish the goals outlined.

Milton Security Group LLC --- 1440 North Harbor #900 Fullerton CA 92835 -- (714) 449  
8490

PROJECT MANAGEMENT:

MSG will assign a project manager to manage all aspects of the project and be directly responsible for (1) managing schedules and budgets; (2) project planning; (3) technical oversight; and (4) reporting project outcomes.

SETUP COSTS:

MSG expects to be onsite doing the installation, testing and tuning and integrating the solution at Silicon Valley Power. Total Setup and Configuration Costs shall not exceed \$4,500.

TRAVEL COSTS:

MSG will bill SVP actual travel costs (hotel, food, airfare, mileage, etc.) for the consultant traveling to Santa Clara. MSG will provide receipts and documentation support for all travel expenditures. MSG assumes a per diem food allowance of \$30.00 per day and estimates that travel costs will not exceed \$2,000 over the term of the contract

MONTHLY COSTS:

MSG will provide services as identified below. Invoicing will be done at the start of the month for the coming month. This includes the rental of all required equipment, including warm spare units, and support.

	Monthly Standard Rate	City of Santa Clara SVP Monthly Rate	Yearly Rental Cost
Subscriber Mgmt System Rental and Support	\$5,300.00	\$3,950.00	\$47,400.00

TOTAL PROJECT COSTS (First Year):

Setup Costs	Travel Costs	Monthly Costs	Total Costs
\$4,500	\$2,000	\$47,400	\$53,900
